

Seaweed dryer

Seaweed dryer is the professional dryer for fruits

Quick and good quality

High efficiency

Keep primitive color

Seaweed dryer can meet to dry different seaweed big granule and produce in batch

Meanwhile it can maintain content of nutrition, color, etc of vegetable in most extent

The type raw materials are garlic, cushaw, giantarum, white turnip, yam, bamboo shoot, capsicum, onion, apple, and more

When operation, air will be entered into the dryer and heated through heat exchanger

Being adapted scientific and reasonable cycle method, the hot air will pas through raw materials to be dried on the bed and carry out uniform heat exchange

Under the action of cycle fan, the hot air stream inside each unit of the dryer will carry out hot air cycle

Final air with low temperature and high damp will be out

The whole drying process with stably and high effect will be finished
